

Event Registration

Since 1983, we've been building event registration systems for small and large venues.

iPad™

AirPrint™

Name Tag

Name Tag

iPhone™

**Lead Retrieval
Session Tracking**

Above is all the hardware you need, for a complete registration system for your next event.

This is a complete solution package, built on 30 years experience, that is designed for quick launch. The only hardware needed is an iPad, and any AirPrint enabled printer. Includes contact data barcode, that allows an iPhone or iTouch™ (without internet or WiFi access) to read and collect attendee information. Perfect for lead retrieval and session tracking or access.

Event Registration

Built for fast replication & launch, so that in only a few hours an event can be created, including custom logo, field names and custom questions, for OnLine and OnSite use.

Four modules available

- OnLine Registration (any browser or mobile device)
- OnSite Registration (recommend iPad)
- Lead Retrieval (iPad or iPhone/iTouch)
- Session Tracking (iPad or iPhone/iTouch)

For small or large events. Solution can be scaled up to where it can handle 1,000's per hour. So far our record for a single location is 2,700 per hour (DC Convention Center, Oct. 2011)
